

PistolCam™ Features

MPEG 4 Video/Audio

Movie quality video with sound at 30 frames per second. Record time is 60 minutes.

Auto Stills

Takes 3.2 megapixel digital photos upon shot recoil.

Digital Camera

Takes 3.2 megapixel digital photos whenever you want, or on press of shutter button.

Laser Targeting

Can be preset to auto-activate if desired.

Tactical Illuminator

Can be preset to auto-activate if desired.

Rechargeable Lithium Polymer Battery

Integrated state of the art power management allows for over one week in standby mode.

Remote Activation

With the use of an optional holster, allows the unit to begin recording as soon as it is drawn from the holster.

Encrypted Software

Protects evidence integrity allowing for Chain of Custody Protocols and preservation of Video Documentation. Up to Windows Vista supported. Cannot currently be used with Windows 7, as drivers are not available.

Remote Screen Viewing

Remote Viewing allows training instructors to view target images in real time.

Remote Switch for Rifles

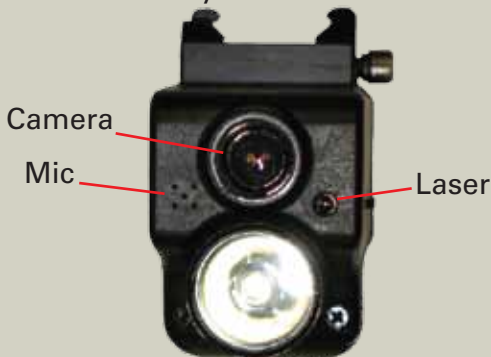

An optional remote switch is available for use on rifles, shotguns, etc.

Gun Not Included

PISTOLCAM™

CAMERA • LASER • ILLUMINATOR

Integrated Video Documentation
Targeting Technology

LAW ENFORCEMENT VERSION
CHAIN OF EVIDENCE COMPLIANT
OR
STREAM & RECORD FOR TRAINING

Security Software

The full Law Enforcement version with password protection and encrypted Security Software features aid in evidence chain documentation. The Mini-USB port can also provide instant downloads, allowing for distribution of photo/video documentation to aid in the apprehension of fleeing suspects.

PistolCam is also available in a version that requires no additional software. In this case, no password is required and PistolCam appears similar to how a flash drive looks to your computer.

Finally, PistolCam can be configured to stream video and record at the same time, making it perfect in a training environment.

Shown with optional remote switch

Specifications

Memory: 512MB (40-60 minute video)

Video/Audio: MPEG4, 30 frames/sec

Stills: 3.2 megapixel JPEG format

File download rate: 12 Mbps via USB 1.1

Power: powers up in <2 seconds

Charging time: 3 hours

Battery life:

Camera only ON: >5 hours

Camera/flash/laser ON: 2 hours

Standby: 500 hours

Tactical illuminator: 120 lumens @ 3 meters

Laser Targeting: Class III red, elevation and windage adjustments

Remote Activation: Remote Switch provides for system activation at the user's discretion

Auto On: Using an optional magnetic holster, purchased separately

Many Mounting Options

Using different optional mounts and the optional remote switch, you can also use PistolCam on Rifles and Shotguns.

Training Applications

PistolCam provides trainers a whole new platform from which to educate and demonstrate weapons handling and shooting skills. Using video or recoil activated high resolution still photographs, a trainer can better assess a shooter's form at the precise moment of fire. On a computer monitor the trainer can then show the shooter the effects of proper or improper shot execution. A shooter can even utilize PistolCam independently for his/her self evaluation.

Video Documentation

Exonerates Police Officers in 93% of documented incidents, according to the International Association Chiefs of Police Report on "The Impact of Video Evidence on Modern Policing".
